VIDEO TITLE HAZWOPER - Laws and Regulations		VIDEO ID NUMBER 5-1058
<p align="center">KEY TEACHING POINTS OF THE VIDEO</p> <ul style="list-style-type: none"> • Refuse Act prohibits any throwing or discharging of refuse into navigable waters. The penalties for such violations are criminal in nature. • The Federal Water Pollution Act and the Clean Water Act were enacted in response to the shortcomings of the Refuse Act. Both of these acts were designed to cleanup the nations water ways and define specific standards for discharges and they are the basis for Coast Guard environmental response programs and do not exempt federal facilities. • The Clean Air Act is designed to protect public health and welfare from the harmful effects of air pollution. State governments must develop plans to enforce these standards. This law also restricts or prohibits new air pollution sources in certain pristine areas of the country. • CERCLA, commonly called the SUPERFUND, protects the environment and establishes a national contingency plan. It establishes the requirement for immediate cleanup of hazardous waste contamination from accidental spills and immediate cleanup of chronic environmental damage. • RCRA applies to anyone engaged in the creation, transportation, treatment and disposal of hazardous wastes. This law established a "cradle-to-grave" system of identifying hazardous substances, and established standards for generators and transporters as well as operators of treatment and disposal facilities. This law also defines the characteristics of hazardous waste. 		
QUESTION	ANSWERS	
	TRUE	FALSE
1 The Refuse Act prohibits throwing or discharging of refuse into navigable waters.		
2 The Federal Water Pollution Act and the Clean Water Act were enacted to respond to the shortcomings of the Refuse Act.		
3 The Clean Air Act is designed to protect public health and welfare from the harmful effects of air pollution.		
4 CERCLA protects the environment and establishes a national contingency plan.		
5 RCRA applies to anyone engaged in the creation, transportation, treatment and disposal of hazardous wastes.
